Naval Information Warfare Center ATLANTIC

Downloading/Installing the Software

Naval Information Warfare Center ATLANTIC

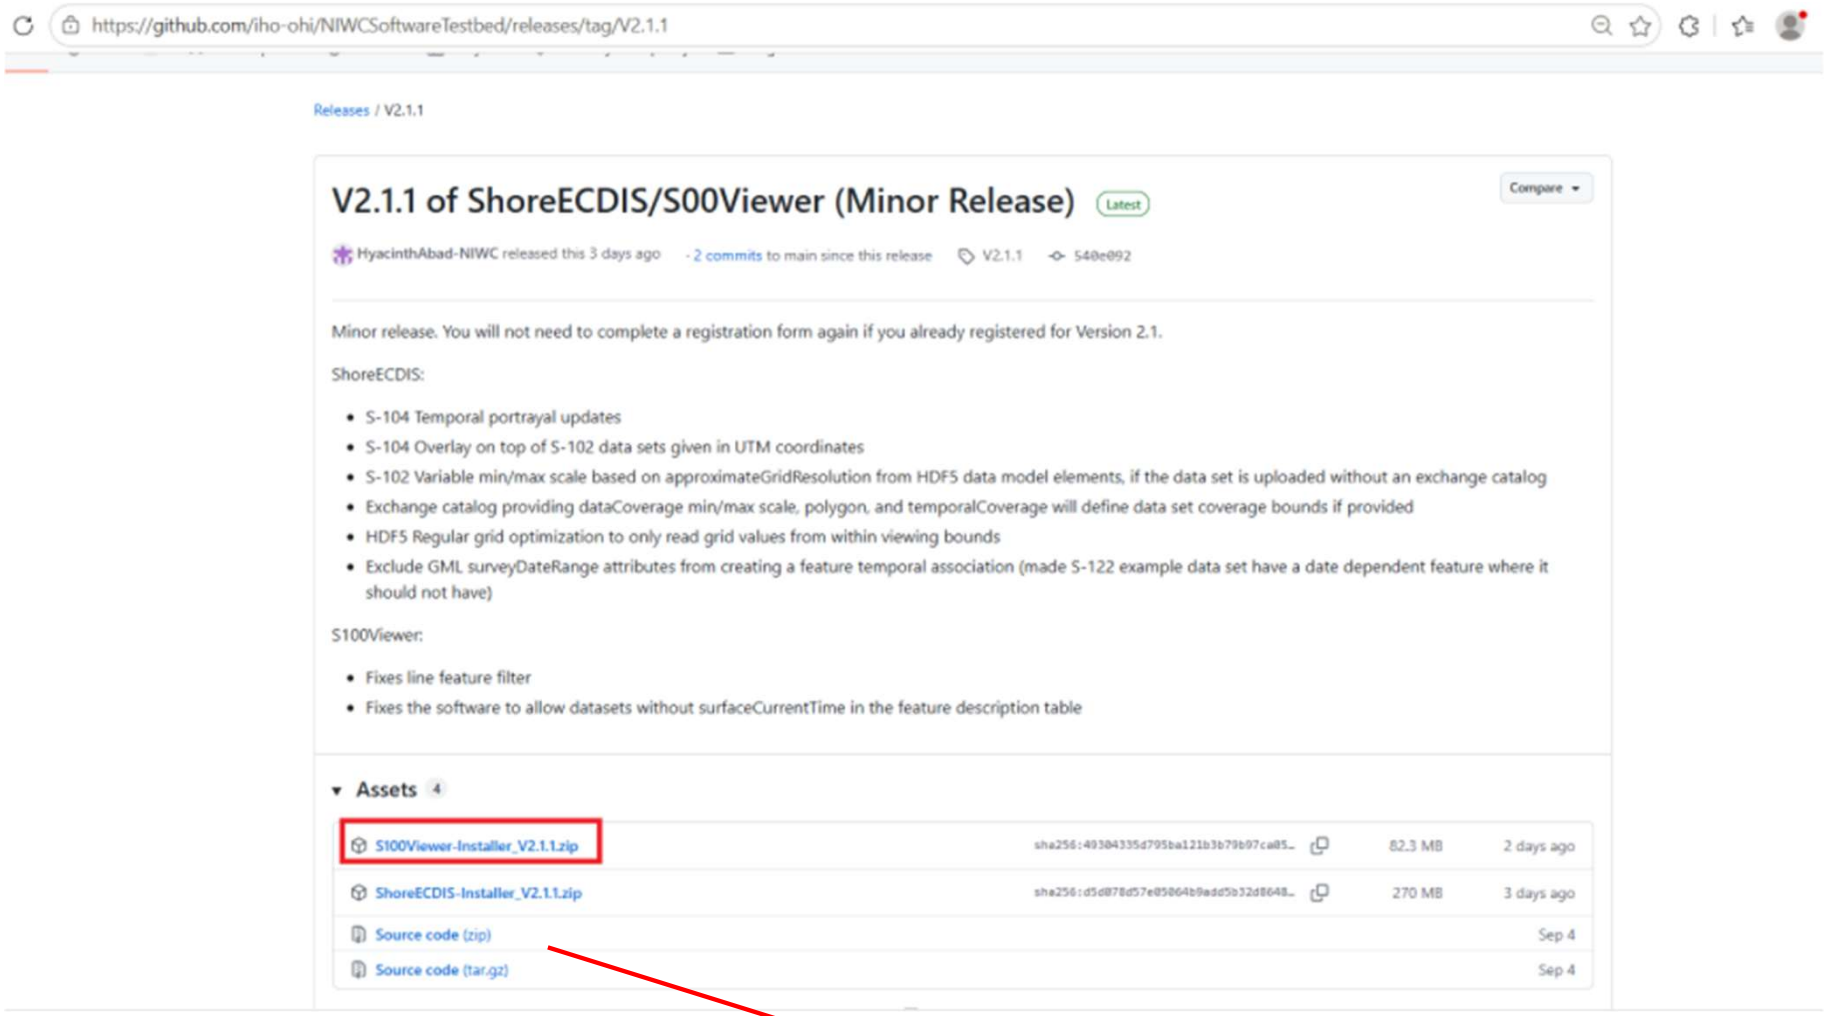

1. Type the following into the URL search bar:

https://github.com/iho-ohi/NIWCSoftwareTestbed

2. Click “Releases” which will take you to the webpage that has the latest release of the software

Naval Information Warfare Center ATLANTIC

1. Click the desired software you want to install.

Follow the directions on the installation process to complete the software installation.

You will receive an “installation complete” message in the end.

Go to the Start menu and search for the software.

2. Note: These files are not the actual source code ☺

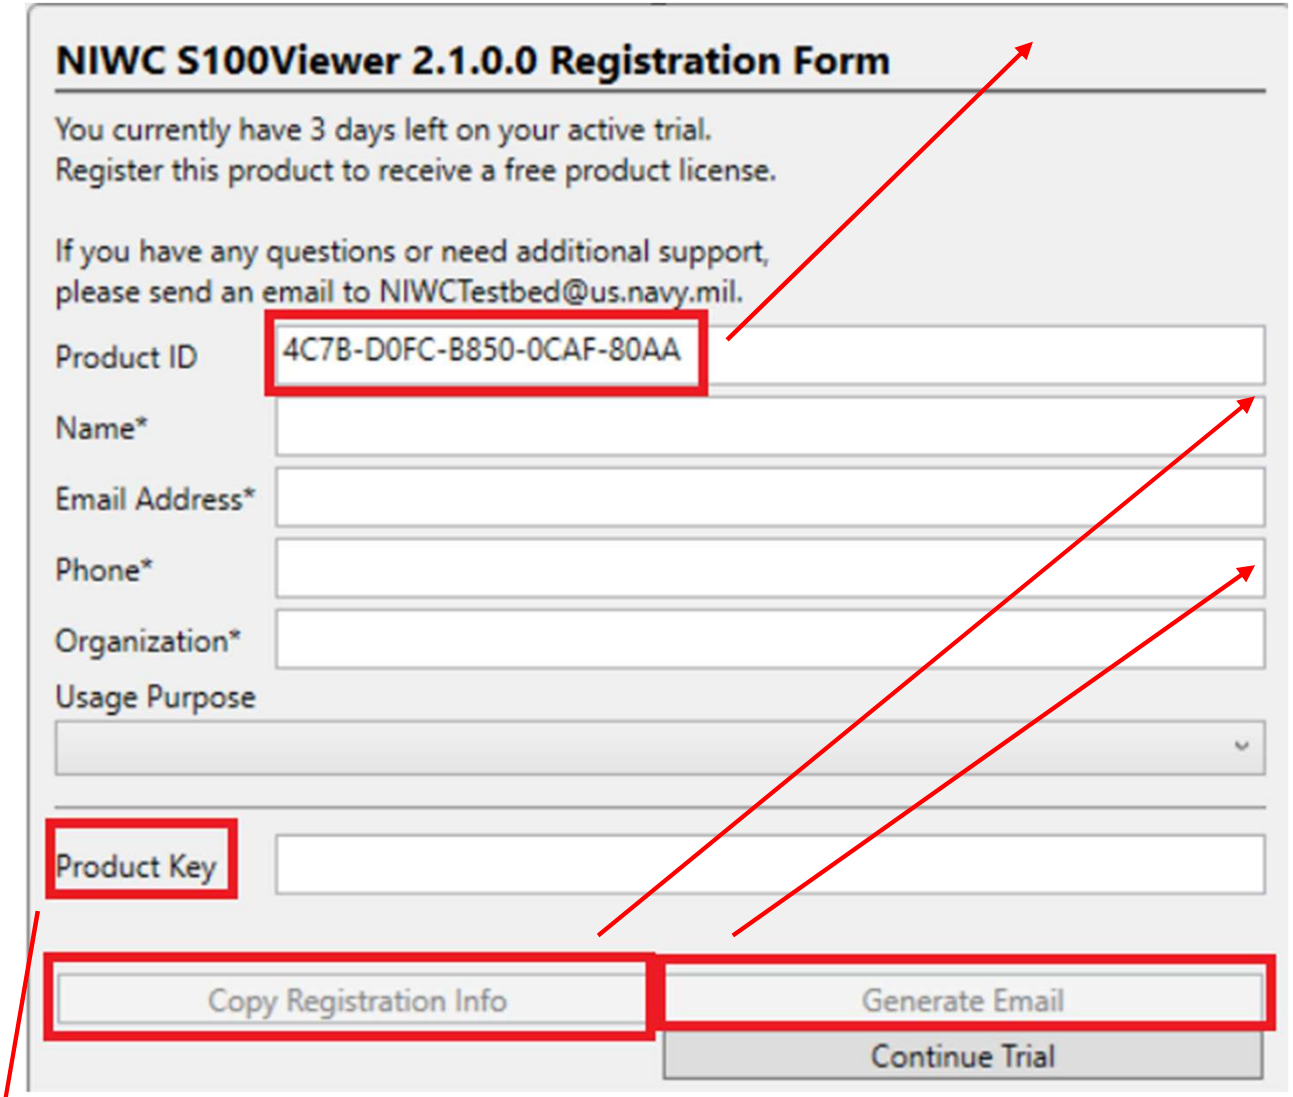

Naval Information Warfare Center ATLANTIC

Registration Form

Naval Information Warfare Center ATLANTIC

1. After the first execution of the software, you will come across the registration form. Each machine that the software is installed in will have its own unique Product ID

2. Once all the required fields are completed, you can either click Generate Email which will open your default email or you can click Copy Registration Info.

If you click Copy Registration Info you must manually open your email and copy and the info into the email.

3. After the NIWC team receives your email, we will send you a unique Product Key which you will input in this box. In the meantime, you have a 3 day trial period.

Naval Information Warfare Center ATLANTIC

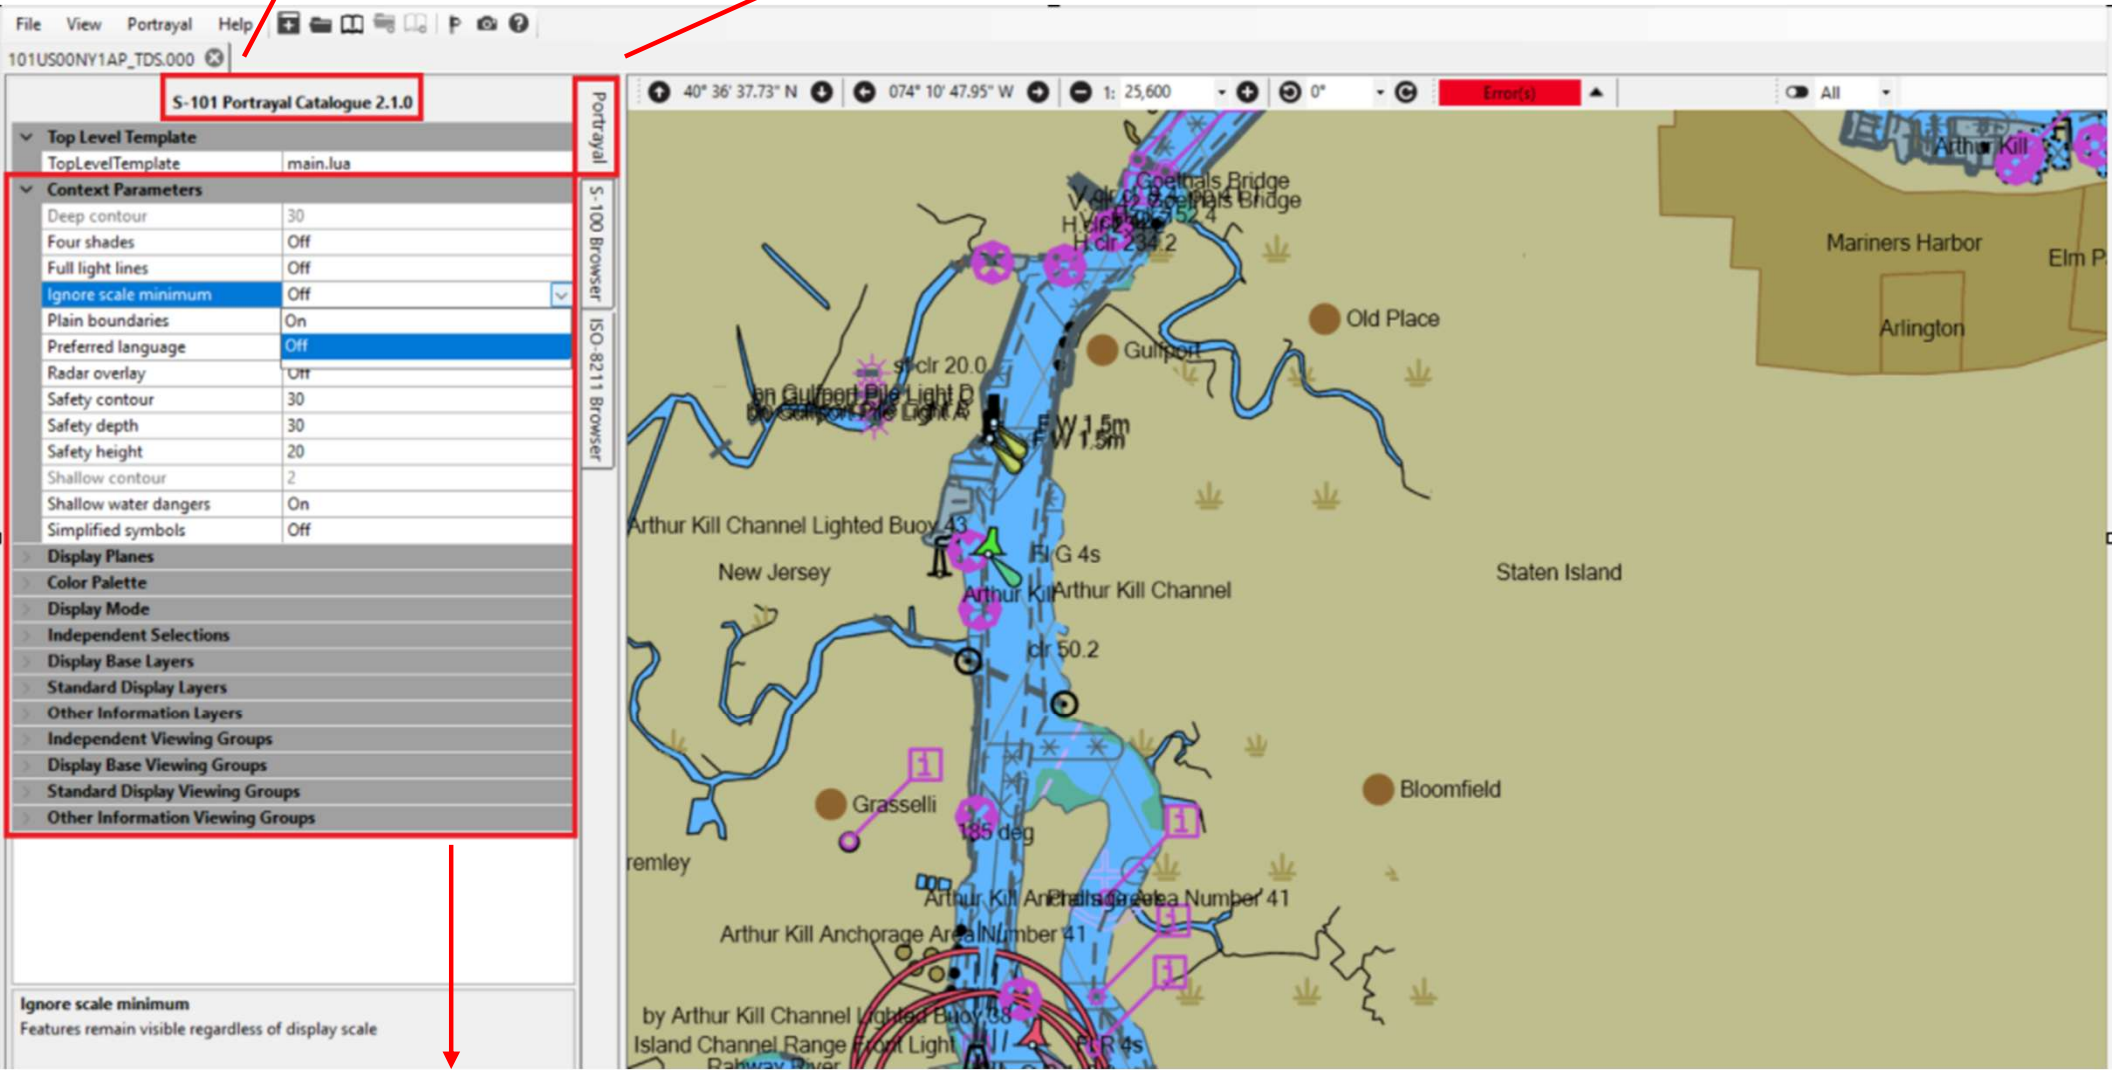

Chart View – Portrayal Tab

Naval Information Warfare Center ATLANTIC

2. The title displays the product and version of the portrayal catalog

1. The portrayal tab displays all portrayal settings that can be changed while viewing the dataset

3. These are all the modes that can be amended in the portrayal settings.
Clicking any selections to the right will allow you to switch on/off specific settings.

Naval Information Warfare Center ATLANTIC

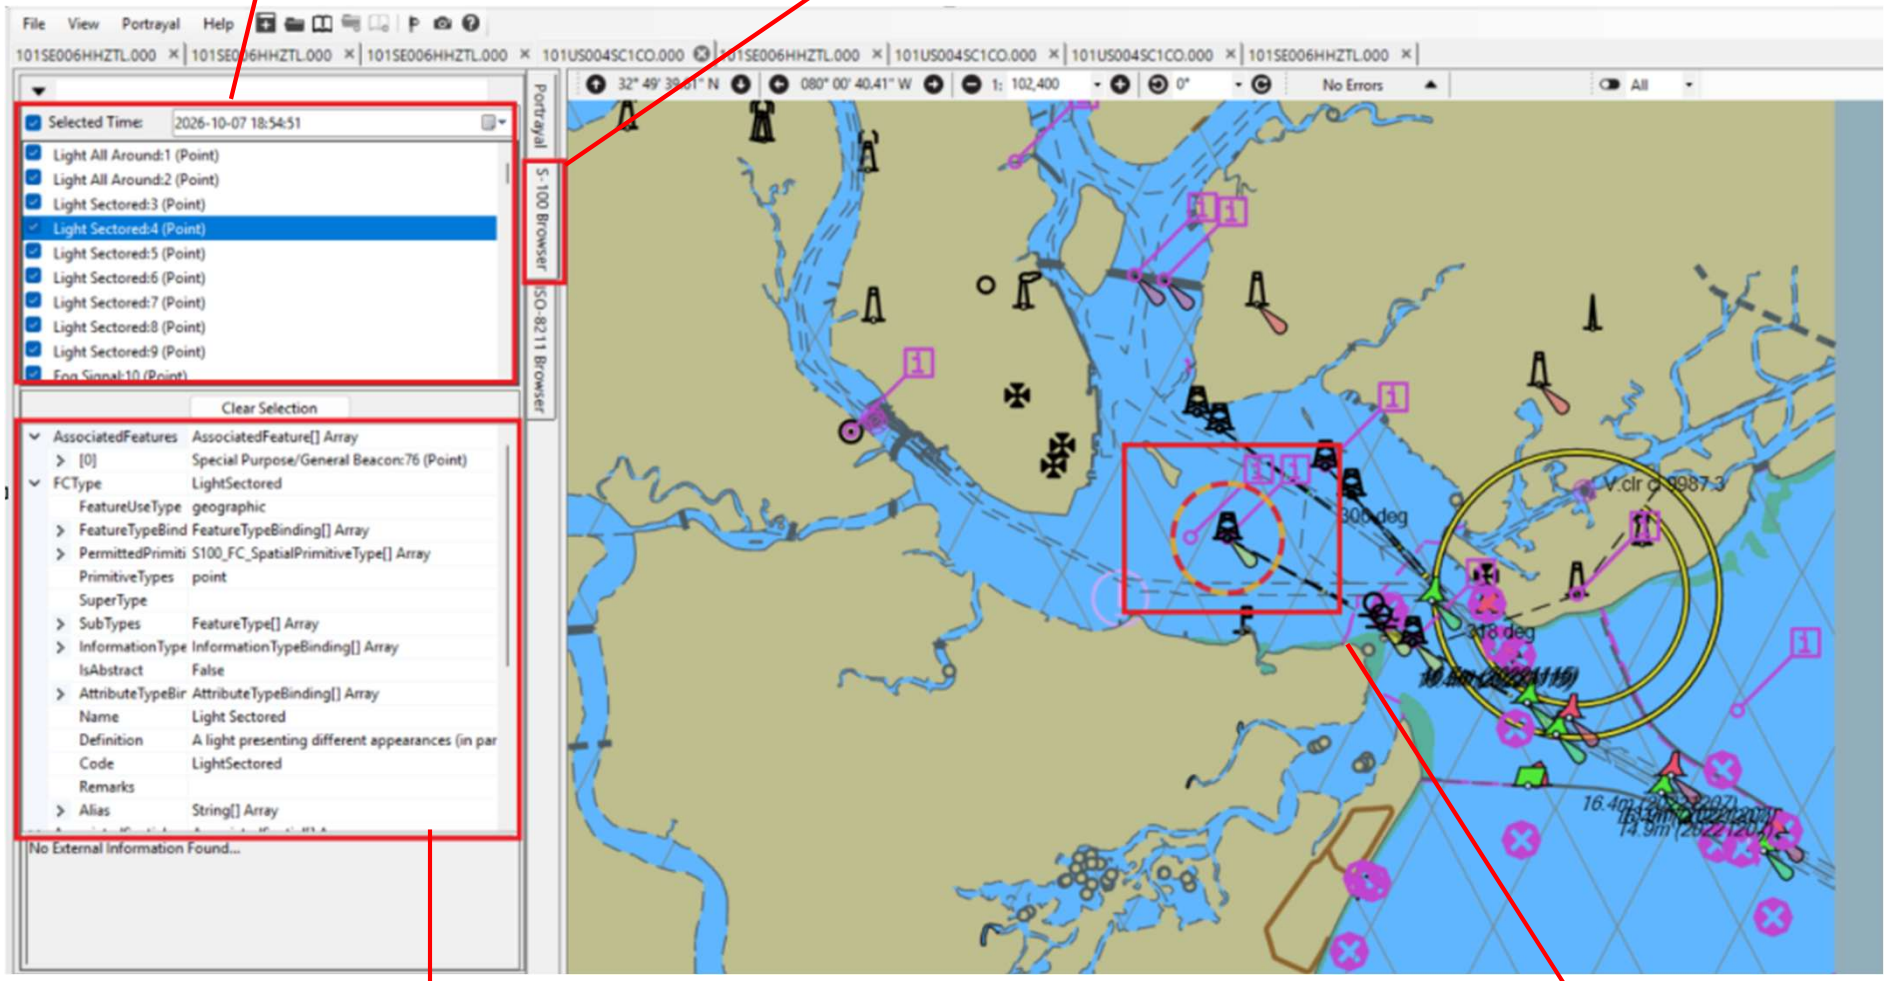

Chart View – S-100 Browser Tab

Naval Information Warfare Center ATLANTIC

2. This feature box displays all the features within this dataset.
Clicking on a feature in this list will highlight that feature in the chart.

1. Clicking the S-100 Browser tab will display feature box which lists all the features in the dataset.

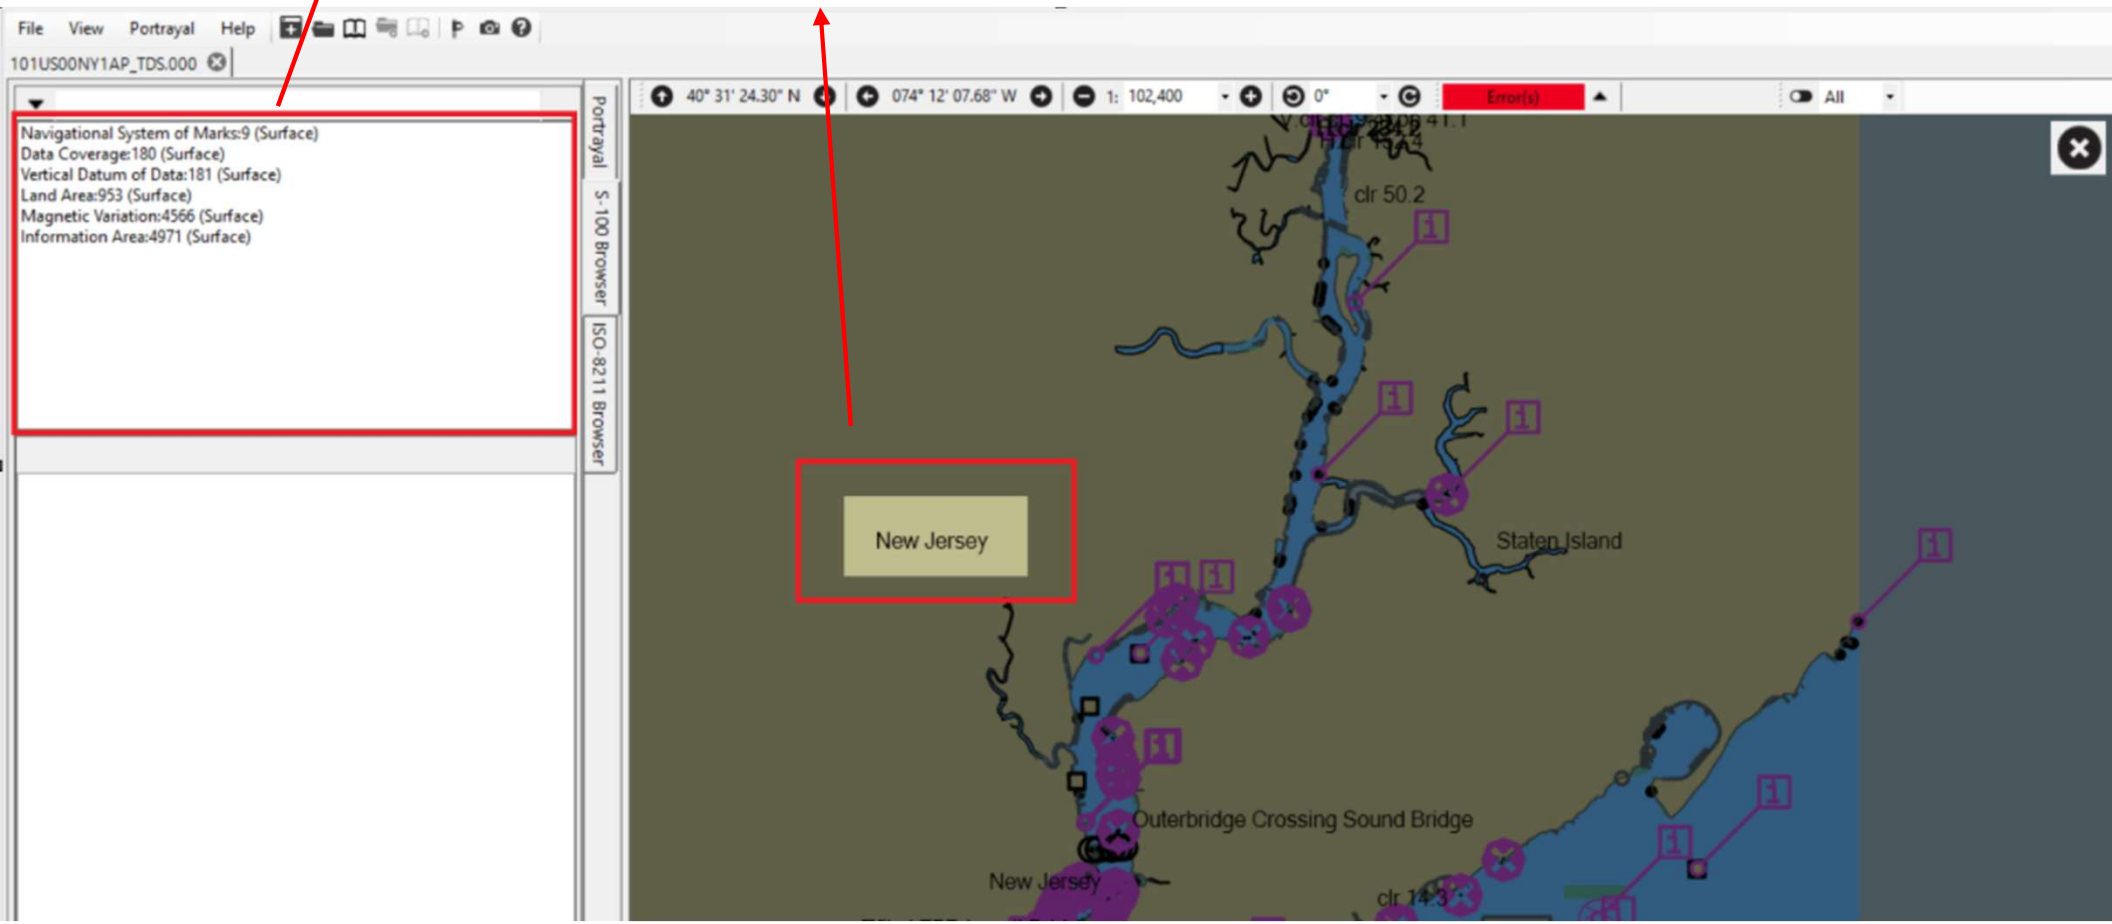

3. This box displays the metadata and associated features of the selected feature.
For example, the FCType, Associated Spacials, and Attributes of the feature are displayed in this box

4. A selected feature will be highlighted in an orange/yellow dashed border

Naval Information Warfare Center
ATLANTIC

1. In the same S-100 Browser tab, if no feature is selected in the feature list, you can highlight any area within the chart by clicking and dragging the cursor. All features that are included in that highlighted area will be shown in the list of features.

In this example, I highlighted the name New Jersey and all features part of the highlighted region is included in the list of features.

Naval Information Warfare Center ATLANTIC

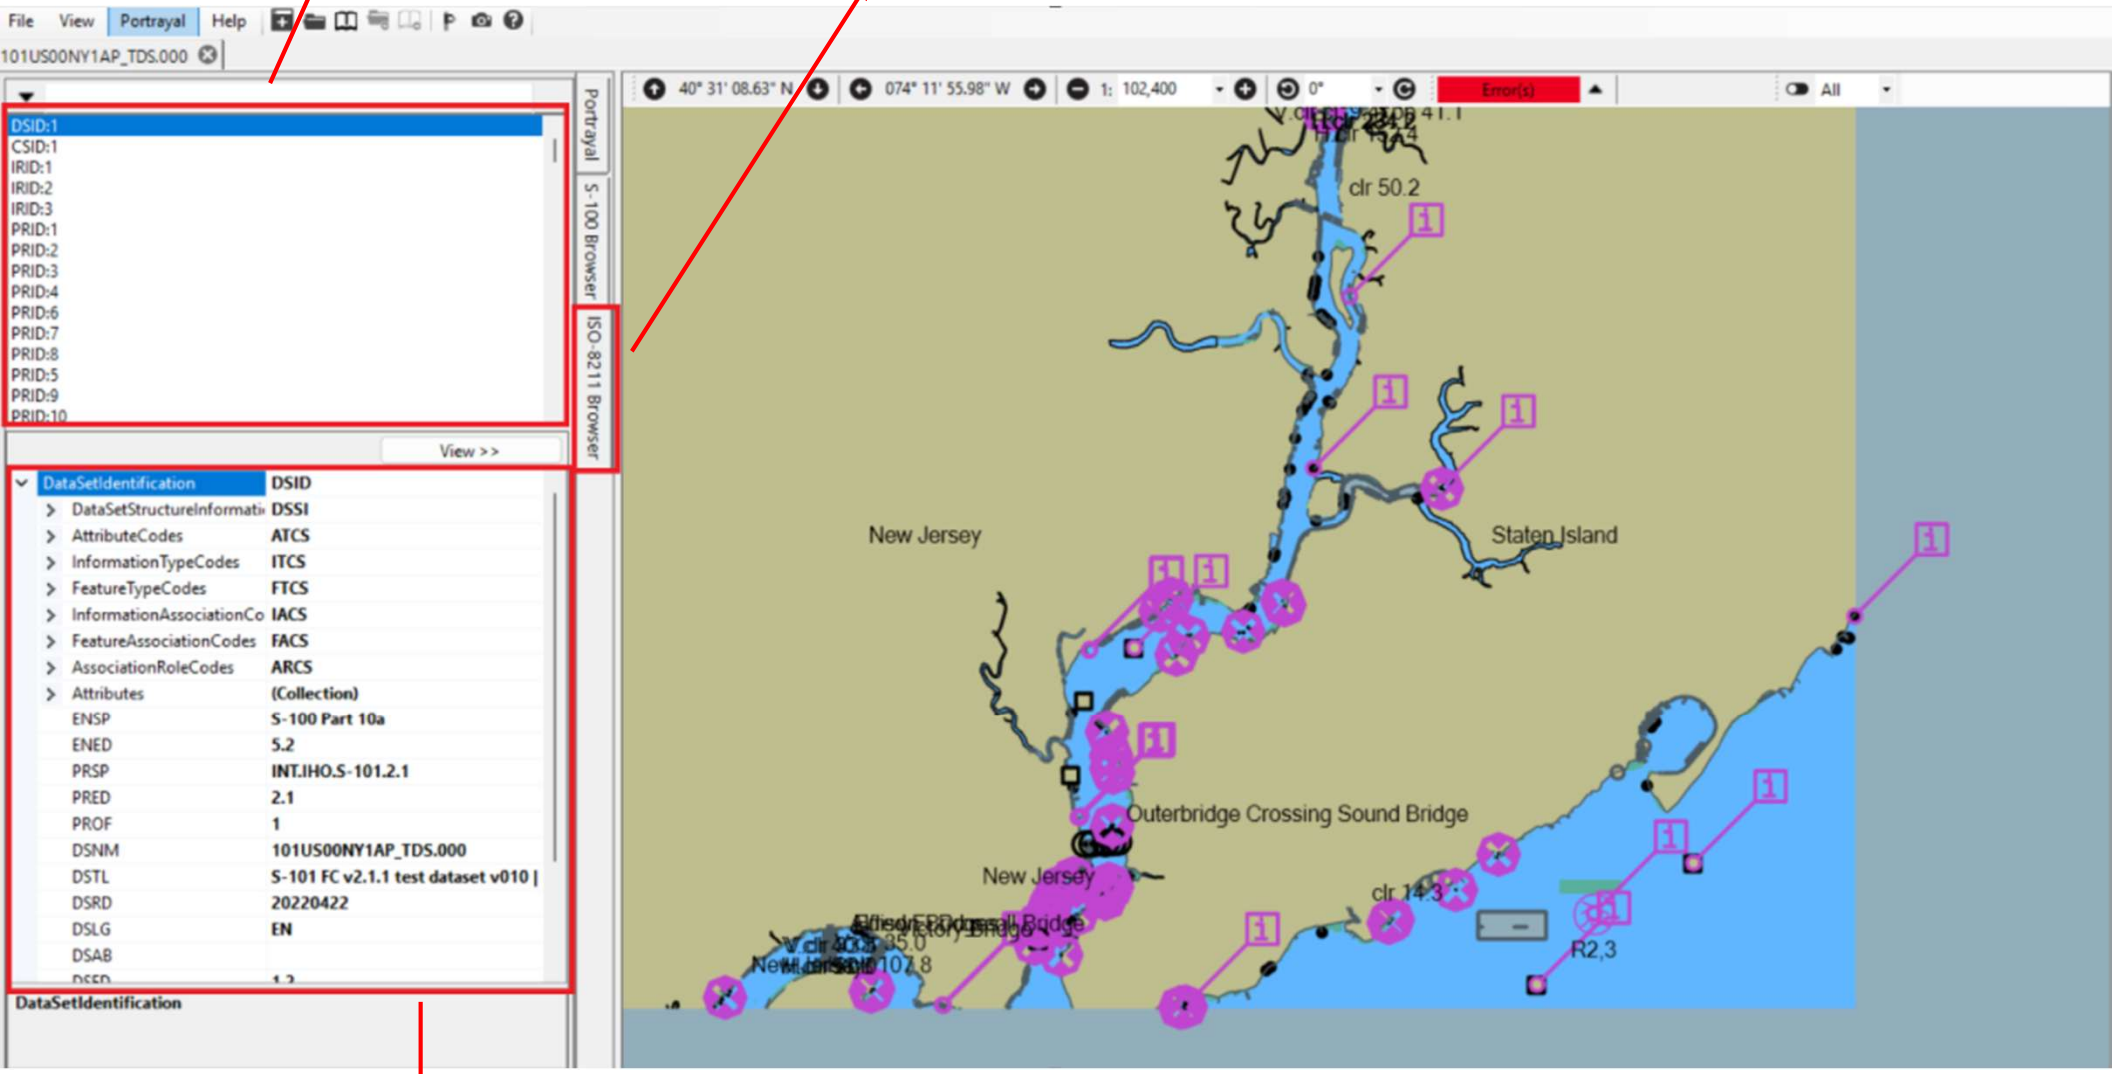

Chart View – ISO-8211 Browser Tab

Naval Information Warfare Center ATLANTIC

2. The list of meta includes Data Set Identification (DSI), Coordinate Reference System Record Identifier (CSID), Information Type Record Identifier (IRID), and Point Record Identified (PRI)

1. In the ISO-8211 browser, you can view the metadata of the dataset

3. Clicking on each metadata attribute allows you to view all the information within that metadata attribute

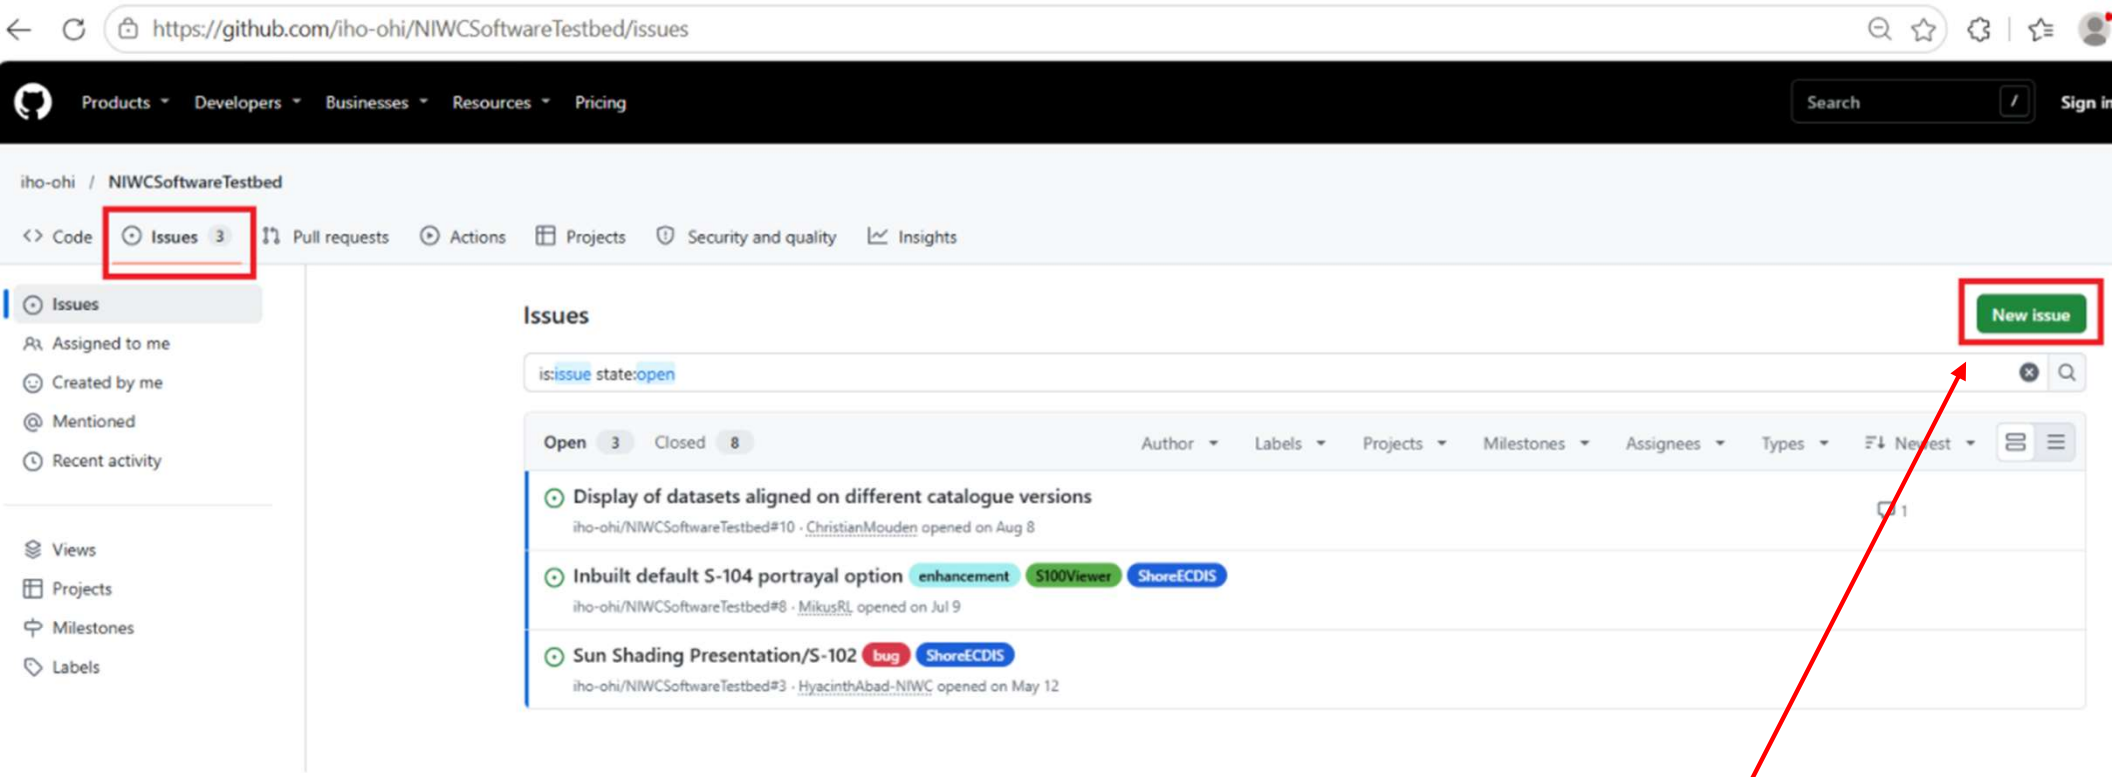

Naval Information Warfare Center ATLANTIC

User Feedback- GitHub and Email

Naval Information Warfare Center ATLANTIC

1. Under the Issues tab on the NIWC GitHub page, you can provide feedback if you encounter any software bugs or have suggestions for improvement/enhancements.

2. Click the New Issue button to create an issue.

You must have a GitHub account to create an issue.
Feel free to read through the Open issues to see if yours has already been noted.
The NIWC team tries to address all software bugs through minor releases.
Enhancements and suggestions are considered for future major releases.
